

CAB Direct 4.1.0 release notes

Date of release: 5 June 2017

Additions

A dedicated version of the CAB Direct platform has been released for smartphones, referred to as the “Mobile” version. This offers the majority of functionality offered by the Desktop version and includes the following features:

Home/Sign in

Search

Facet refine

Abstract

Search History

MyProjects – view saved information and save records, searches, email records, print

Output results: print, email, export

Changes

CAB Direct has been reloaded with the latest database controlled vocabulary, following the re-indexing of the entire database (11.9 million records) with the latest version of the [CAB Thesaurus](#), which was completed in April 2017.

The default search string limit has been increased to handle very long searches, up to 5,000 characters in length. Please note that the default limit may be shorter on some browsers, such as Internet Explorer (2,048 characters). For very long searches, we recommend browsers such as Chrome or Firefox, which don't impose limits on search string length.
